Content-Type	yes	Type of data sent (application/json)

Body

Parameter	Required	Type	Description
-----------	----------	------	-------------

email	yes	string	Email
password	yes	string	Password

Example

```
curl --request POST
--url https://net.wings.rs/api/v0/login
--header 'Content-Type: application/json'
--data '{
  "email": "nbatocanin@wings.rs",
  "password": "MySecret-Passw0rd"}'
```

Response

Body

Parameter	Type	Description
headers	array	Data to be sent in request headers in order to authenticate

Example

```
{
  "data": {
    "headers": {
      "X-Auth-Token": "eyJjbGllbnRJZCI6Ij1jMTE1NDYyLTc0NTYtMTFlYS04ZDE2LTAyNDJh1ed3480"
    }
  }
}
```

```
}
```

In case of an error (status code 401):

```
{  
  "error": {  
    "message": "Credentials Authentication failed"  
  }  
}
```
